RE: Talbot Industries, Inc. Generator Registration

Dear Mr. Trentham:

As we discussed during our phone conversation on May 4, I am enclosing two forms, HWG-1 and HWG-1A, to be filled out for Talbot Industries. These are simply intended to update our computer file data on the company's waste generation; assuming the delisting petition is acted upon favorably at some point in the future, Talbot will at that point no longer be included in our file of hazardous waste generators. However, until that time, the company remains on file as a generator by virtue of the fact that it is a K062 listed process.

Please reiterate to the company that this in no way reflects a change in the department's view of its operation, and that discharge to the POTW remains a satisfactory means of waste disposal.

I appreciate your efforts to clarify past misunderstandings, and hope our phone conversation adequately explained the situation. Please give me a call if you have additional questions.

Sincerely,

Carol R. Eighmey
Chief, Planning and Management Section
Waste Management Program
